DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 12-14 drawn to a subrack unit with plug-in units, classified in class 361, subclass 796.
- II. Claims 9-11 drawn to a plug-in unit, classified in class 361, subclass 736.
- III. Claim 15 drawn to a plug-in unit, classified in class 361, subclass 740.

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claimed subrack may operate without the plug-in units of the subcombination and furthermore, the subrack may accept plug-in units other than those claimed in the subcombination. The subcombination has separate utility such as the plug-in units can be used with various different subracks other than the claimed subrack.

3. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP §

Art Unit: 2841

806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claimed subrack may operate without the plug-in units of the subcombination and furthermore, the subrack may accept plug-in units other than those claimed in the subcombination. The subcombination has separate utility such as the plug-in units can be used with various different subracks other than the claimed subrack.

4. It is noted that claim 8 is also a subcombination of the claims of Group I however cannot be restricted from Group I because the details of this subcombination are essential to the combination. Therefore, claim 8 will be linked with Group I.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
